

## **International Link : working globally, sharing locally**

### **For international businesses and expats**

- Do you come from abroad and now have a presence in the French part of Switzerland?
- Are you from Switzerland but with an international presence?
- Do you have expats or relocated people among your employees?
- Do you know how much it can cost you if those people and their families do not feel at home in Switzerland and decide before long to go back to their countries?
- Do you have difficulties in finding reliable partners and the necessary information to manage and optimize your business in our region?

### **We can help**

We know that it can be very difficult for foreign enterprises to set up operations in Switzerland. We also know it can be hard for employees from abroad and their families to begin their new lives here. It means adapting to new customs and ways of living, learning new and complicated procedures for dealing with the administrative details of life... New things, new people, new culture, new obligations, new suppliers, new rules... new everything indeed!

As a company, you have to find the right people with whom to discuss common problems and possible solutions. You also need to locate qualified reliable local suppliers and service providers. At the same time you are confronted with a complicated legal system and keeping

up with its changes while seeking efficient ways to do political lobbying.

If these challenges sound familiar, you should join International Link, the business group created by the CVCI and the DEV to serve you and your foreign employees. We will assist you in coping with all the above-mentioned complex issues! Our mission is to help you handle everything related to your business integration and personal well-being.

Maximize the prospects of successfully relocating your employees to Switzerland by improving their integration into the local environment and take advantage of an amazing network within the local and international community of the Lake Geneva region!
